

The fund aims to provide long term growth mainly from the reinvestment of income generated by investing predominantly in euro denominated bonds such as government bonds and corporate bonds. The fund is actively managed by our investment teams who may also invest a proportion of assets in other bonds (e.g. non-euro denominated bonds) and/or money market instruments, such as certificates of deposits (CDs) and floating rate notes (FRNs) to try to take advantage of opportunities they have identified.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in. The Fund and its holdings may use derivatives for the purpose of efficient portfolio management, reduction of risk or to meet its respective investment objective if this is permitted and appropriate. The euro value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.
